

WELCOME

Thank you for choosing Fiala Aesthetics Medspa. We are delighted you are here. Our goal is to provide you with an exceptional experience. We offer a wide variety of non-surgical services and products that offer solutions to common appearance concerns and questions.

Getting Started:

We are here to provide you with answers to your specific beauty and skin concerns. Here are just a few questions patients ask us routinely:

- What is the best regimen for me to take care of my skin?
- What products might work best for my skin type and condition?
- What products and services will address or help correct my wrinkles
- What do you recommend for sun damage?
- Is there a quick fix for frown lines?
- Is there anything that can be done for my leg veins?
- Do you offer any solutions for unwanted fat?
- What, if anything, can be done for adult acne?

Under the direction of Dr. Fiala and Phi Nguyen, PA-C, we have a comprehensive selection of the very best FDA-approved products and services to help you solve your skincare concerns. Our experienced staff of aestheticians and nurses will consult with you, and guide you in the best direction. We have answers for all skin types and budgets.

In addition to achieving the results you desire, our promise to our patients is that our techniques are safe, scientifically-valid and effective.

Please fill out the attached questionnaire on your appearance concerns, and let the journey begin. We'll be sending you our monthly specials via eblast, and look forward to talking with you.

From all of us at Fiala Aesthetics Med Spa, we wish you healthy beautiful skin.

Thomas Fiala, MD, FACS, FRCSC
Medical Director
